

Objective-C, JavaScript and Sketch walk into a bar...

Hosted By
Adrian T.

Details

Intro
Communication between developers and designers is not as frictionless as desirable. Different mindsets, tools, backgrounds make collaboration a PITA sometimes. This workflow will allow designers to focus on design, then integrate the project's designs token in their fellow's projects in one step.

Speaker: Diego Freniche
Behind a keyboard since computers used tapes. Started as an intern and climbed the corporate ladder until decided smartphones were the future (back when phones were still called smartphones). Also didn't want to wear a suit anymore. Nowadays working as iOS / Appcelerator dev at the best company for developers in the world, Teamwork.
