# From Mobile to MongoDB: store your app's data using Realm

## **Details**

### **ABSTRACT**

Storing data locally in a mobile device has many challenges: designing a good data layer, taking care of multithreading, transactions, errors... and if you want to store that data in the cloud? Offline state management, REST or GraphQL API calls, JSON parsing, etc. Why not use Realm, get all the infrastructure code you need for free and focus on your app's features?

In this session we'll share several code samples, for Android, KMM and iOS, and develop a local app that stores data using Realm.

## **AGENDA**

18:00 - Welcome and registration

18:20 - Host introduction: Vodafone Innovation Hub

18:30 - Lightning talk: "Chatbots - The most human face of artificial intelligence" by Alba Ruiz

18:45 - Talk "From Mobile to MongoDB: store your app's data using Realm" by Diego

20:30 - Farewell

Freniche 19:45 - Drinks and snacks

**IMPORTANT**: please, fill in this form to pre-register and get immediate access on the day of the event. Thank you!

### **SPEAKER: ALBA RUIZ** Twitter, LinkedIn

### **SPEAKER: DIEGO FRENICHE** { name : "Diego Freniche",

title: "Developer Advocate",

company: ["MongoDB","Mastodon","LinkedIn"], pronouns: "he/him/his",

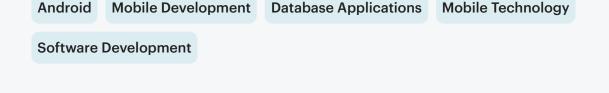

location: "Seville, Spain", bestComputerEver: "AMSTRAD CPC 464" }

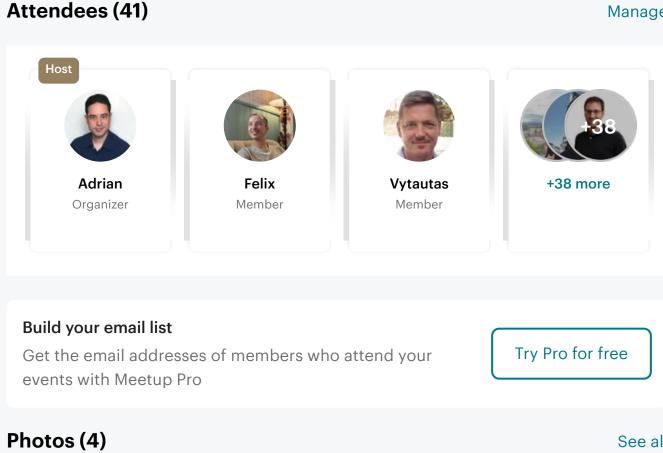

**HOST AND SPONSOR** 

### Special thanks to our host and sponsor for this session: Vodafone Innovation Hub.

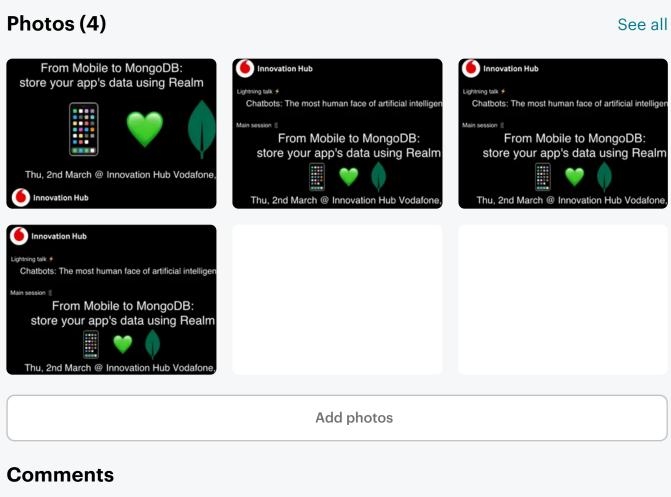

Vodafone Innovation Hub, Malaga is where a growing team of highly skilled tech

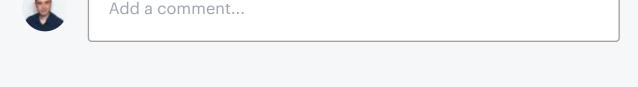

pioneers develop innovative products and services to keep Vodafone at the forefront of innovation and deliver customer experience excellence.
