Agenda:
18:30 Welcome

18:45 Presentation by Malin and Kai

19:30 Chat with host

20:00 Q&A with participants

20:30 Farewell

Abstract:
In this talk, Kai and Malin will chat about their approach to designing and building a new, native app for macOS, iOS, and, iPadOS, as a team of two, using SwiftUI. They will talk about their decision to use SwiftUI and about the future of Apple Platform development. They will also highlight some approaches to working together as a small team and the impact this has on the tools they're using.
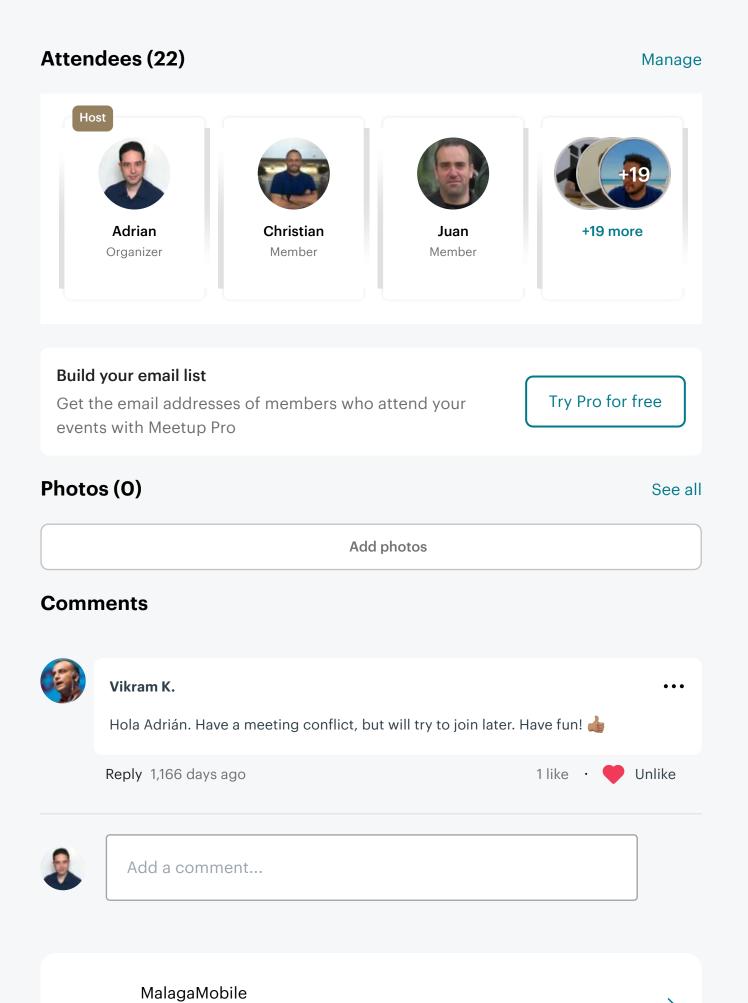

Bio:
Kai and Malin have been developing for iOS using UIKit for many years and have recently released their fist (SwiftUI) macOS app.

They are originally from Germany and Sweden, but their journey has taken them through the freezing Arctic Circle, to the blisteringly hot deserts of Australia, to finally settling in beautiful Vancouver, Canada.

Online session:
This will be an online session hosted in the Discord platform. Please, kindly create an account, if you haven't done so yet. The link will be active 15 minutes before the session.
